DISCUSSION

The current Capital Improvement Program identifies construction of the Antelope Valley "O" Street Bridge Project to occur in fiscal 2007. The identified funding sources for construction of the project include Highway Allocation Funds (SO), Federal Aid - Urban Area Projects Funds (PC), and State/Federal Other Funds (SF) (\$1,320,000).

Federal funds will be utilized for that portion of the project construction and construction phase engineering services that are not eligible work items associated with the U.S. Army Corps of Engineer's Antelope Creek Flood Control Project. In accordance with federal requirements, the local sponsors cannot utilize other sources of federal funds as part of their required local match for the Antelope Creek Flood Control Project.

The schedule for this project has been developed to allow construction of the new bridge to begin in the Fall of 2006 with the completion of all work by August of 2007. The work will be completed in phases and temporary pavement will be constructed as necessary to maintain traffic flow along "O" Street throughout the duration of the project.
